Don't Forget!

- Don’t keep nasty rabbits or any with recessive genetic flaws
- Use a scale and use it often
- Poor dams and sires pass those traits on
- Poor or sick animals pass the problems on

Ask yourself when you keep a rabbit ‘is this better than what I have?’
If it’s not, then cull it.

Breed hard, cull hard.
Keep the best, eat the rest.

You don’t improve by buying winners; you make them!
